Washington, D.C. 20510  Washington, D.C. 20515

Dear Leader McConnell, Leader Schumer, Speaker Pelosi, and Leader McCarthy:

As Congress considers legislation to respond to the coronavirus pandemic and assist with economic recovery, we are writing to request Congress suspend the 12% federal excise tax (FET) on the purchase of new heavy-duty trucks and trailers until the end of 2021. As representatives of the trucking industry and other important sectors of the economy, we believe that the suspension of the FET would serve as an extremely effective and immediate policy to spur the sales of newer cleaner trucks, which would retain jobs in the trucking sector and help rebuild our economy.

Truck sales in the United States are now predicted to decline by 50% in 2020\(^1\) due to the pandemic. In March, Class 8 truck orders dropped by 52% compared to last year.\(^2\) As a result of government-ordered closures, truck manufacturing plants and truck dealers have either suspended or scaled back operations. To jump start the economy after the pandemic, a suspension of the burdensome FET, which increases the cost of new heavy-duty trucks and trailers by $22,000 on average, would immediately spark the purchase of heavy-duty trucks and trailers. In turn, this would help save or bring back the livelihoods of the 7.8 million Americans employed in jobs related to trucking.\(^3\)

In addition to saving jobs, a suspension of the FET would spur sales of today’s cleaner and safer heavy-duty trucks and trailers by making them more affordable during this difficult economic time. Over the past two decades, the trucking industry has made strong environmental gains, and today’s heavy-duty trucks are cleaner than ever before. Cleaner fuel and engines utilizing advanced technologies have combined to reduce nitrogen oxide emissions by 97% and particulate matter emissions by 98%. Since 2010, more fuel-efficient diesel trucks have saved 101 million barrels of crude oil and reduced CO\(_2\) emissions by 43 million tons. Suspension of the

tax would also encourage the sale of newer trucks, which have the latest safety technologies that help reduce roadway crashes and related injuries and fatalities.

During this crisis, our nation has been more dependent than ever on our trucking fleet for delivery of goods and critical medical supplies, yet the average age of a truck on the road today is almost 10 years old. We believe the suspension of the FET can help both in keeping the nation well supplied and in rebuilding America’s vital trucking industry and related employment. The organizations below are united in urging Congress to suspend the FET in any upcoming coronavirus legislation. Thank you for your consideration.

Sincerely,
